# **Revision 295**

## Added by Lars van Duijnhoven 7 days ago

refs: #13546

Werkende code die meerdere stopberichten kan ontvangen (van meerdere meetkasten) en onderscheid kan maken tussen 29 bit en 11 bit identifiers, gecombineerd met wat bug fixes.

### **Related issues**

• Feature #13546: Configuratie code aanpassen op de CU zodat deze meerdere meetkasten kan configureren
